

FIG. 1 is a perspective view of a mechanical assembly 100, such as a pump, in a first position. The assembly 100 includes a housing 1, a rotor 2, and a stator 3. The rotor 2 is mounted on a shaft 4 and is configured to rotate within the housing 1. The stator 3 is mounted on the housing 1 and is configured to surround the rotor 2. The assembly 100 is shown in a perspective view, with the housing 1, rotor 2, and stator 3 being the main components. The rotor 2 is shown in a first position, and the stator 3 is shown in a first position. The assembly 100 is shown in a perspective view, with the housing 1, rotor 2, and stator 3 being the main components. The rotor 2 is shown in a first position, and the stator 3 is shown in a first position.

Fig. 1

FIG. 2 is a perspective view of the device 100 in a closed position. The device 100 includes a base 10, a top plate 20, and a central assembly 21. The central assembly 21 includes a plurality of vertical rods 22, a horizontal plate 23, and a central shaft 24. The base 10 includes a plurality of vertical rods 7, a horizontal plate 6, and a central shaft 11. The top plate 20 includes a plurality of vertical rods 25, a horizontal plate 10, and a central shaft 21. The device 100 is shown in a closed position, with the central assembly 21 and the top plate 20 aligned with the base 10.
